

Unlocking Efficiency and Growth

Wolverine Power Cooperative's Journey with Astra Canyon

INTRODUCTION

Operational efficiency is critical to staying competitive. For Wolverine Power Cooperative, legacy systems and fragmented workflows were limiting their ability to scale and adapt.

To modernize operations and support future growth, Wolverine partnered with Astra Canyon to implement IFS, creating a more integrated, efficient, and flexible foundation for their business.

THE CHALLENGE

Legacy systems slowing a growing energy provider.

As Wolverine Power Cooperative expanded, its outdated systems introduced inefficiencies and operational complexity. The need for a unified, scalable solution became increasingly urgent—especially amid external challenges like the COVID-19 pandemic.

Outdated & Disconnected Systems

Legacy infrastructure limited visibility and efficiency

Manual, Cumbersome Workflows

Processes relied heavily on spreadsheets and workarounds

Limited Scalability

Systems couldn't support growth or evolving business needs

Complex Implementation Environment

Transformation began during COVID, adding pressure to delivery

TURNING POINT

A vision for a unified and scalable future.

Wolverine recognized the need for a comprehensive ERP solution to unify operations and enable long-term growth. After evaluating options, IFS emerged as the ideal platform due to its flexibility, scalability, and ability to support customization without heavy code changes.

With Astra Canyon as their implementation partner, Wolverine set out to build a system tailored to their operational needs.

EXECUTION

Collaborative, tailored, and built for impact.

Astra Canyon worked closely with Wolverine to implement IFS in a way that aligned with both immediate needs and long-term strategy.

1 Strategy & System Design

Defined ERP requirements and aligned IFS capabilities with operational goals

2 Customization & Integration

Developed custom workflows, reporting, and integrations to support unique processes

3 Deployment & Optimization

Implemented IFS and refined processes to improve automation and data visibility

RESULTS & BUSINESS IMPACT

More efficient, integrated, and future-ready operations.

With IFS in place, Wolverine Power Cooperative gained a modern, unified system that improved efficiency, reduced complexity, and enabled better decision-making.

- **Single Source of Truth Established:** Centralized data improved visibility and accuracy
- **Improved Operational Efficiency:** Automation reduced manual processes and increased productivity
- **Custom Workflows & Integrations:** System tailored to fit specific business needs
- **Enhanced Collaboration Across Teams:** Unified platform streamlined communication and workflows

“IFS has allowed us to have one source of truth rather than multiple data sources. It has made several processes more efficient and made data more visible and easier to access.” said **Michelle Clements, Director of Enterprise Systems, Wolverine Power Cooperative**

WHY ASTRA CANYON

Ability to take ownership of complex migrations

Strong collaboration with client teams

Flexibility under tight timelines

Innovative approach to data transformation

Let's turn your migration into a strategic advantage.

Connect with Astra Canyon to get started.
